

Position: Aerospace Sheetmetal Repair Technician II

Job Duties and Responsibilities: Performs structural repair on Legacy and 5th Generation aircraft structures, preventive maintenance, modifications, inspections, and repairs to fixed or rotary wing aircraft, using specialized equipment, in accordance with appropriate federal aviation regulations, manufacturer's recommendations, technical manuals, and/or Government/Industry Standards. Maintains a comprehensive record system of all maintenance work performed on each system to comply with the component mandates of the Federal Aviation Administration (FAA), DoD, AS9100 Quality Management System, and/or the OEM. Performs assembly of modification kits and any other tasks required to support shop or site workload. We are looking for individuals that will thrive in a challenging project-based environment with a charter of providing state of the art capabilities to legacy & 5th Generation aerospace systems.

Essential Functions:

- Aerospace structural maintenance, modification, and repair functions.
- Prepares aircraft sheet metal layouts and design templates.
- Mechanic repairs, replaces, and rebuilds aircraft structures, such as wings and fuselage, and functional components including rigging, surface controls, and plumbing and hydraulic units, using hand tools, power tools, machines, and equipment such as shears, sheet metal brake, welding equipment, rivet gun, and drills
- Performs inspections on fabricated and repaired work items.
- Willing to travel for Contract Field Teams.
- Assist Engineers in understanding manufacturing processing techniques to assist in design and creation of parts.
- Perform Quality Assurance functions in support of AS9100D requirements.

In addition, the ability to climb ladders, stoop, bend, be on your feet for extended periods of time, and lift and/or carry items weighing over 50lbs is required.

Basic Qualifications:

- Requires a minimum of 5 years' experience on aircraft.
- Must have knowledge of manufacturing and engineering environments including product configuration, manufacturing principles, concepts, and practices.
- Experience in performing supervisory functions.
- Must have exceptional problem-solving abilities.
- Must be able to work independently.
- Must be detail oriented and organized.
- High School Diploma or Equivalent
- Must be a US Citizen. Must have the ability to obtain a Secret clearance. A current US Secret clearance is a plus.
